Removal of Significant Adverse Effect

- **Proposed Amendment:** Mixed Competition regulation will no longer allow a school to determine if a male athlete will have a “*significant adverse effect*” upon the participation of female student-athletes.
 - *“Where a school does not provide sufficient opportunity for students of different genders to participate on separate teams, schools must permit a student of a different gender to participate in the team selection process. The expectations for personal and social responsibility, health, physical fitness, and sport-specific skill development and knowledge of the game requirements must be the same for students of all genders.”*
 - *Points to consider- impact on our female athletes*
 - *Position of Section 6 and other advocacy groups*
